

LIGHTWEIGHT DAYPACK

Big Day Out

Our established, long-range, active-dynamic daypack for walkers, cyclists and snow tourers has been steadily enhanced since its introduction more than 5 years ago. The revised back system employs our Dyna-FORM internal 3-D frame sheet, slimline shoulder harness and Mini Synchro-FORM 25 independent hip wings. The result is great dynamic stability and comfort whether you are out on foot, skinny skis or the pedals. This 35 litre day pack sizes up perfectly for a long day out on the hills, even a lightweight over-nighter under stars or natural shelter. Adding to its very useful capacity, the bag fit-out includes a stretch over-load panel, side pouches, a choice of two internal compartments for your water bladder and attachments and stabilisation for your essential gear.

FEATURES

- » Integral, low-profile, slimline shoulder harness.
- » Tough stretch fabric overload panel - great for a rain shell.
- » Stabilised, quick-stash side pouches in stretch fabric handle walking poles, water bottles, pumps and lots more
- » Retro-reflective panel and rear light mount
- » Skinny ski attachment points
