

EXPEDITION BACKPACK

Freycinet 75

Built for extended expeditions through wet, remote country. Featuring a roll top closure and removable lid, this 75 litre pack has enough capacity for all the things you need, and nothing you don't. Load transfer onto the body is via our proven AX frame system and revolutionary, slim-line Synchro-FAST harness system.

FEATURES

- » Single-compartment, high-volume, canvas bag
- » The long, roll-top throat allows the pack to accommodate larger loads.
- » Detachable top cover with generous pocket converts to a waist pack
- » Front gusset pocket expands to accommodate snow shovel, or offers space for wet/dry separation
- » Two, reinforced vertical webbing ladders on the pack bag allow for complete flexibility in bag compression, adding pockets and lashing specialized equipment as required
- » Equipped with one detachable hydration sleeve and side bottle pockets
- » Fully compatible with a wide range of Wilderness Equipment backpack accessories: daypack-convertible top covers, harness and bag mounted pouches and sleeves for tablets, laptops and documents
