

CYCLING BAG

Fun Bucket

Supplied in a pair, these padded canvas cylinders toggle each side of the head stem with one of their two shockcord loops passing over the bars. These ultimate stash bins are the minimalist load carrying solution for day cycling. Use them however you like.

They accept standard one-litre water bottles. If you want a little extra capacity or wish to spread things out more than a Transconti Handlebar Bag provides for, go for a set of Fun Buckets! Note also that all shockcord, on all WE equipment, is easily replaced.

FEATURES

- » Toggles for simple, secure attachment to bicycle head stems.
- » EVA foam padding for insulation and increased abrasion resistance.
- » Draw string throat.
- » Reflective logo for safety.
