

EXPEDITION PACK

Prion 85

Built for extended expeditions through wet, remote country. Featuring a roll top closure and removable lid, this 85 litre pack has enough capacity for all the things you need, and nothing you don't. Load transfer onto the body is via our best-in-class Synchro-FORM Hi-LOAD harness system.

FEATURES

- » Single-compartment, high-volume, canvas bag.
- » The long, roll-top throat allows the pack to accommodate massive loads.
- » Detachable, dual-compartment top cover converts to effective waist pack.
- » Front gusset pocket expands to accommodate snow shovel, or offers space for wet/dry separation
- » Three-dimensional side pockets are large enough to accommodate a 1 litre water bottle, the butt of a rifle, or the bottom of a ski (for high, a-frame carry)
- » Open space behind side pockets for low ski carry
- » Alpine hardware racking loops on hip harness, and ice axe carry on front panel
- » Hydration-sleeve internally, with a tube port on either side of shoulder harness
