

BACKPACKING SHELTER

Tectite 4

The ultimate family backpacking tent. Our own quest to accommodate a family of four lead to the Tectite concept and this extraordinary tent. Its reliable performance in wind and rain, the huge 5.3 square metres of floor space, airy ventilation and complete insect protection, are all achieved at a minimum-pitch weight of just over 2.0 kilograms. Four pegs tension the elevated tub floor which connects to the canopy rim via a full perimeter mesh band. A detachable ceiling panel, acting exactly as an inner tent roof, intercepts any condensation drips on those still, damp nights. Cycle tourers wanting some space to spread out, or rock climbers looking for a 'crag hotel' will also find much appeal in this cavernous tent.

FEATURES

- » Single-pole, hybrid-single-skin, ultra-light two-person tent
- » Accommodates up to four adults
- » Effective (and innovative) outer tent vents at ridge height
- » 30d sil/sil nylon 66 ripstop outer skin with 3,000mm HH
