

SHELTER ACCESSORIES AND SPARES

# i-Shadow Groundsheet

This hexagonal shaped ground sheet fills the footprint of the i-Shadow outer tent and suspends above the ground on all sides. With this accessory the i-Shadow had the potential to shelter up to four persons, which makes it a great 3-season backpacking solution for a young family of four. Thanks to its shape, this is also an excellent ground sheet for two people sleeping out under the stars. The extra fabric not occupied by your sleeping mats is a great place to put your extra gear, keeping it out of the dirt.
